WORK EXPERIENCE

DistBit: January 2022 - Now

Flutter Developer

- Maintainence in legacy apps for crypto excanges, while at the same time advising a new version for this app, using clean arquitecture and a new UI design.

Svelte and Node Developer

- Developing an admin platform wirtten in SvelteJs with typescript to manage collaborators enrollment and credit requests for Bancrea (México). In addition I fixed some bugs in the api writen in NestJs

Odigós: April 2021 - January 2022

NextJs and NestJs Developer

- Developed the functionalities of a client for a small training platform, mostly integrating the backend but working most of the frontend.
- Continuous refactoring process on the backend to apply best practices and improve code maintainability.
- Continuous migration to Typescrip of the frontend coded in NextJs.

EDUCATION

Universidad de Colima

Software Engineering | Agosto 2019 to February 2022

- Studied from project management, networking, electronics, web and mobile programming.
- Always standing out among my classmates in programming, database and mathematics.

HOBBIES

In my spare time I like to learn about new technologies that are becoming relevant in the world of technology.
I also like to learn the concepts of clean code and ddd.
When I already completed my task I like to help my work partners to improve their codes or to resolve some bugs.
